

Date and Time:

Wednesday, September 11th, 2019 – 6:00 – 7:30 pm

Title:

Immediate Dentin Sealing – Live Demo

Description:

This session starts by a short lecture on Immediate Dentin Sealing (IDS), covering indications, techniques, clinical cases, and literature review. During the live demo, important topics such as isolation techniques, choice of materials, application of IDS (Step-by-step), Do's and Don't's and considerations in temporization immediately after IDS will be discussed.

Instructor:

Mehrdad Razaghy DDS

Bio:

With a B.S. in biological anthropology and an extensive research background, Mehrdad reached his long-term dream of studying dentistry at Herman Ostrow School of Dentistry at USC. After receiving his bachelor's degree, he spent a year focusing on his research in the field of neurosurgery and was part of six major publications at David Geffen School of Medicine of UCLA. His passion for creation and research carried through his path as a dental student and allowed him to be involved in various research projects. Mehrdad's journey in dental research began by joining Dr. Pascal Magne's research laboratory during his first year as a dental student. Since then, Mehrdad has been part of multiple projects, alongside visiting scholars, under the mentorship of Dr. Pascal Magne. His focus has been on restorative techniques and dental materials. He has been part of publications in the esteemed Journal of Dental Materials and International Journal of Esthetic Dentistry and practices general and restorative dentistry at WLA Dental Center, a private practice in Los Angeles. Alongside his daily practice, he continues to do clinical and laboratory research and lectures in a variety of restorative topics.

Short Course objectives:

- Indications
- Techniques
- Literature review
- Clinical Cases
- Materials
- Live demo (Step-by-step)
- Isolation
- Considerations
