

# Advances in Digital Dentistry

In Association with Beverly Hills Dental Laboratory

## Tuesday, October 8, 2019

### LEARNING OBJECTIVES

- Recognize how to incorporate recent technological advances as part of the treatment plan
- Understand how digital impressions can help create an accurate final restoration
- Understand the materials and processes available for CAD/CAM restorations
- Identify cases where guided surgery planning would be helpful for implant placement

### PROGRAM DESCRIPTION

Digital dentistry is changing the way general dentists, surgeons, and laboratory technicians interact with one another and plan treatment. Incorporation of CAD/CAM technology for restorative solutions can help deliver natural-looking, esthetic results for patients. Connectivity between current CAD/CAM scanners and intra-oral scanners allows the restorative doctor to take a digital impression, make any occlusal modifications chairside, and send the file to the laboratory to design the restoration. This program will review recent advances in digital technology; the increasing importance of the partnership between the dentist and the lab; the differences between various materials used for copings and abutments; surgical planning software for implant placement and restoration; and the many benefits available to the treatment team when using digital dentistry solutions.

**Speaker** Victor Czarnetzke, Straumann Lab Territory Manager & Corey Miller, Straumann Business Development Manager

**Date** Tuesday, October 8, 2019

**Time** 5:30 PM – 6:00 PM *Registration*  
6:00 PM – 8:00 PM *Program*  
*Food will be provided*

**Location** Beverly Hills Dental Laboratory  
9100 Wilshire Blvd, Suite 400 West  
Beverly Hills, California 90212

**Audience** G - General Dentist, GP/Prosth, S - OMS, S - Perio, Specialist

**Subject Code** 610

**SAC** Straightforward/ Advanced

**Type** Lecture

**CE credit** 2.0 Hours

**Tuition** Complimentary
